

Nichiden Group Environmental Policy

■ Policy and Basic Approach

Nichiden Corporation is a general trading company that specializes in mechanical parts and systems. In consideration of our users' needs, we fuse our expertise with cutting-edge technologies to create production facilities and systems that have no adverse effects on local communities or the global environment. Also, together with our group companies, we endeavor to operate in an environmentally conscious manner and engage in the following ongoing environmental conservation and improvement activities in order to realize a better global environment and harmonious coexistence with society.

1. Climate Change

We will reduce energy use and carbon emissions in our operations and supply chain. We will also push sales of products that help reduce carbon dioxide emissions and thereby reduce through the supply chain the environmental impact of society.

2. Biodiversity

We will take into consideration the protection of ecosystems in the areas where we do business and will work to conserve biodiversity through activities that contribute to the local community.

3. Chemicals and Hazardous Substances

We will work to prevent and mitigate the impact of environmental pollution caused by chemical substances, oil, and other harmful materials, and to reduce and properly dispose of hazardous waste.

4. Conservation and Effective Use of Water Resources

We will work to reduce water consumption through efficient use and recycling and ensure proper treatment of water.

5. Resource Recycling

We will contribute to the creation of a circular economy through the sustainable use of resources in our supply chain (fossil fuels, minerals, others), thereby reducing resource consumption and reducing and recycling waste.

6. Compliance with Laws and Regulations

We will comply with international declarations, rules, and treaties regarding environmental conservation; the laws and regulations of the countries and regions

in which we operate; and any other agreements we have made.

7. Environmental Management System

In order to achieve our environmental policy, we will set, and periodically review, environmental objectives and targets and will actively pursue environmental improvement. In addition, we have established an Environmental Management Committee, headed by the president, and we will provide education and training to all employees in the Nichiden Group to ensure that they understand and enact our environmental policy.

8. Information Disclosure and Communication

We will work to actively disclose information about the environment and will pursue communication with society.
